Product!**

THE LEWIS CRUSTBUSTER
AERATE AND CONDITION LITTER.

For over 50 years, Lewis Brothers has led the way in the development of litter management equipment for the poultry industry. Quality workmanship and dependability are built into every Lewis Brothers product. Our products are backed by a nationwide network of trained professionals who are ready to assist you with sales and service.

We offer several models of the Poultry Housekeepers along with various options that allow for custom configurations. The Lewis Housecleaner makes the wash down process simple while saving the operator valuable time. The patented Lewis Litter Blade gets in those hard to access corners and side walls allowing for a more thorough cleanout process. The Dump Body Housekeeper is the

perfect answer when stockpiling litter and comes in 4 different models to accommodate various conditions. If spreading is all that is needed, then the Lewis Spreader Body is the right choice for 'in-the-field' as well as placing new shavings in the house. The Windrower is the right choice for a single machine that can perform all the steps necessary for 'in-house' composting and windrowing.
